

Vertical SAS™ Bumpers

Standard Kit

SAS™ Crushing Fork Kit

“L” Shaped Forged Forks Kit

S.A.S.™ Bumpers are Designed to Prevent Vehicle Damage

Vertical Bumpers

- Designed to prevent front and rear damage to vehicles that are picked up long ways
- Adaptable to fit many other manufacturer’s forks
- Special rubber pad with center flex cavity, cushions & protects many types of cargo from damage
- Installation involves welding metal brackets to carriage or vertical portion of forks
- Rubber pads can be replaced in 5 minutes. Replacement rubber pads can be ordered from S.A.S.
- Initial installation of standard kit can be completed in about 1 hr or less, welding required

Rocker Panel Bumpers

- Designed to eliminate damage to car doors on vehicles picked up sideways
- Clearance is provided for most car door mirrors, yet not reducing the effective fork lifting length
- Adaptable to fit many other manufacturer’s forks
- Installation kit includes all necessary hardware
- Rubber pads are easily replaceable and available for immediate shipment from S.A.S.™ stock
- Install in about 1 hr or less, welding usually not required

To Order: Please phone or e-mail and specify:

- Vertical *or* Rocker panel style
- Fixed width S.A.S.™ Forks *or* Adjustable Forged Forks
- The width of your fork blades
